

HOMEWORK

Homework is a constructive tool in the teaching/learning process when geared to the needs and abilities of students. Purposeful assignments not only enhance student achievement, but also develop student self-discipline and associated good working habits. As an extension of the classroom, homework must be planned and organized, must be viewed as purposeful by the students' learning; and should be evaluated and returned to students in a timely manner.

Teachers may give homework to students to aid in the student's educational development. Homework should be an application or adaptation of a classroom experience, and should not be assigned for disciplinary purposes.

A teacher shall clearly explain to his/her students how homework assignments relate to the grading system.
